

I gain a tremendous benefit from listening to XM Satellite Radio and its traffic and weather channels. Satellite radio provides variety and quality listening that is truly not available elsewhere. Over the years I've become extremely frustrated with FM radio and their "only play what sells" marketing tactics. There is so much more quality music being produced every day that FM considers too risky to broadcast. I pay a premium for Satellite Radio services and it should not be up to the National Association of Broadcasters to dictate what I am permitted to hear. I Respectfully urge you to reject the NAB's petition 04-160 and to support XM's ability to provide the kind of programming that I demand and deserve.
